Chief, [REDACTED] 25X1

5 January 1955

Chief, [REDACTED] FOIAB3B1

Site Survey, [REDACTED] 25X1

25X1 1. Attached is an outline instruction to the Chief Engineer,
25X1 [REDACTED] to cover the performance of a site survey in the
[REDACTED] vicinity. Emphasis is placed on location of suitable
sites on which a small emergency operation could be established within
a short time if it should at some future date be determined that a move
25X1 of the [REDACTED] is deemed necessary or desirable. A reception
survey in the strict sense is not required since it is felt certain
25X1 that the best available reception of Democratic Republic of Vietnam
stations will prevail in the [REDACTED] area. On-site reception is
necessary principally to determine freedom from man-made noise and
local on-channel station interference.

25X1 2. Upon arrival at [REDACTED] 25X1 [REDACTED] should report to the
American Ambassador, [REDACTED]. Although the Charge d'Affaires
25X1 has already been briefed on [REDACTED] mission, an early meeting with
25X1 the Ambassador is considered essential. The Embassy will suggest some
sites for [REDACTED] consideration.

25X1 3. [REDACTED] 25X1 will be provided with a check in the amount of
\$500 in confidential funds, being forwarded separately, which will be
used for payment of automobile and battery rental and other expenses
incidental to the survey not covered by his overt travel orders. Mr.
25X1 [REDACTED] attention is called to Regulation FB 10/C dated 25 September
1952 regarding security considerations. 25X1
